

eFORMATTER

Cloud-Based Data Conversion Utility
Powerful, Yet Auto-Magically Simple

FIXED ASSET
CONSULTING
Crazy About Your Assets

“ We spent 15 to 20 hours every month manually extracting and formatting data from 20 financial reports so we could import into our budgeting software.

Now eFormatter does the same job in just a few minutes. ”

eFormatter

Sometimes it seems like technology creates as many problems as it solves. Simple tasks that should be routine - like exporting data from SAP or Oracle into Microsoft Excel - are complex, expensive, time-consuming and error-prone.

That's why we created eFormatter!

eFormatter is a powerful cloud-based service that can extract data from any system or report and “*auto-magically*” convert it into a commonly-used format like .CSV, .XLS, or PDF - without ever touching your database or software!

HERE'S HOW IT WORKS

As a report-driven utility, eFormatter takes your existing report output and then converts into any format you need.

Initial Set Up

- You provide copies of your reports and specify the desired output.
- We perform our magic, writing code and mapping fields.

After Set Up, Using eFormatter is Simple

1. Upload your reports or documents to our secure, cloud-based portal.
2. Let eFormatter extract the data and apply user-defined formatting rules.
3. Edit the data online in an Excel-like spreadsheet.
4. Download your new file format/output!

Simply login, upload your files, press a few buttons, and you're done!

THE BENEFITS

Some of the most important benefits of eFormatter include:

Saves Time & Money

Manual data conversion that takes days or weeks is reduced to just minutes.

Improves Speed & Accuracy

eFormatter eliminates manual data manipulation and transcription errors.

No IT Support Required

Not only is eFormatter really simple to use, it runs in the cloud so there is no software or server to install, configure, and support.

It Never Breaks

Unlike installed software or a custom database connection utility, eFormatter isn't affected by software upgrades - so version updates won't break it.

COMMON EFORMATTER TASKS

eFormatter was born out of necessity. For years, we've used this same tool to help hundreds of clients solve common challenges like:

- Move disparate data from a fixed asset system to budgeting software
- Seamlessly transfer HR data to a payroll system or service (like ADP)
- Effortlessly pass fixed asset updates to an ERP system (and vice versa)

It's highly flexible and totally customizable - if you can think it, we can build it using eFormatter.

PRICING

eFormatter is available as an affordable monthly service (plus a one-time set up fee because each formatting process is custom-built). Once you start using it, you'll find that eFormatter quickly pays for itself.
