

## WHAT IS BUSINESS PROCESS MANAGEMENT (BPM)?

It's a question we hear whenever we talk to companies about **TaskCentre**.

The simple answer is that Business Process Management (or BPM for short) is about **AUTOMATION**.

Using technology to convert employee tasks and workflow procedures that are slow and manual, into fully automated business processes that are fast, efficient, and consistent every single time.

## WHAT IS BPM SOFTWARE?

Business Process Management Software like **TaskCentre** is designed to optimize your business processes and automate as much as possible to minimize human touch points and manual labor.

A particular area of focus when it comes to BPM software is automating tasks that are mundane, repetitive, don't require a high degree of skill or critical decision making, and are easy to automate.

Some people call it admin or overhead labor - we call it inefficiency and lost profits!

## BENEFITS OF BPM SOFTWARE

Companies using BPM software like **TaskCentre** almost always experience improvements like:

- **Near-Perfect Accuracy** - no more duplicate data entry, typos, or transposition errors.
- **Lightening Fast Efficiency** - when you automate mundane and repetitive process, they get done faster and more efficiently.
- **Significant Cost-Savings** - you reallocate valuable time, money, and human resources to more profitable and meaningful activities.
- **Increased Revenue/Profit** - you get more product made, orders shipped, and customers served with less effort and fewer resources.

*What Do You Want to Automate?*

**BACK: DISCOVER TASKCENTRE**

## TaskCentre for Sage

**TaskCentre** is a powerful suite of Business Process Management (BPM) technologies that can **automate virtually any manual process**, driving error and inefficiency out of your business.

This all-in-one "Swiss Army Knife" technology **works with your existing Sage system** (ERP, CRM, etc) so there's nothing to replace or upgrade.

It simply complements your current technology, making it even better!

### Workflow Automation

Improve productivity of your workforce by intelligently routing tasks, in the right sequence, to the right employees. Converts manual labor into **self-running automation**.

### Integration

Bridge the gap between disconnected systems - ERP, CRM, e-commerce - with no hard-coding or technical "wizardry" required. **No more duplicate data entry!**

### Critical Business Alerts

Real-time alerts of critical events that shorten your reaction time and keep you one step ahead of the competition. **React before a minor issue becomes a big problem.**

### Document Automation

Automatically generate and route company documents like invoices, orders, and financial reports without manual intervention. **The right reports, the right people, at the right time.**
